

TE-W Series

Temperature Monitoring Thermal Imaging System

**Measurement of
body temperature at
non contact distance**

LARGE SCALE SCANNING

Rapid scanning of any person with high fever (symptom of H1N1 Swine flu, H5N1 bird flu and SAR) in public places, entertainment places, institutions and manufacturing sites so as to

- Prevent the wide spread infection to co-workers
- Prevent infecting the food chains by personnel working in the food industries
- Prevent the crippling of essential services and operation due to workers high absentee rate

TE-W

NON-CONTACT MEASUREMENT

- As a non-contact temperature measurement system, it ensures the health safety of personnel on duty.

AUTO ALARM

- Automatic alerting of operator by SOUND buzzer when person with high fever temperature is detected.

THERMAL SENSITIVITY AT 0.1°C
**REALTIME TEMPERATURE
MEASUREMENT**

Thermal Video

Specifications

Model:	TE-W
Resolution:	160 x 120
Frame Rate:	50Hz
LCD	2.5 inch
Temp Range	20 ⁰ to 50 ⁰ C
Thermal Sensitivity	0.1 ⁰ C
Color palette	11
Thermal Video:	YES
Focus	Manual
Movable Spot	4
Movable Area	3
Alarm / Alert	YES
Battery operated	YES
Media Storage	Built-in internal memory

TEi-P Series

Temperature Monitoring Thermal Imaging System

Measurement of
body temperature at
non contact distance

Higher Performance

The TEi- P thermal scanner is a newmodel with ergonomic design for better handling and operation. It has all the basic functions of the TE-W model and in addition, it includes extra capabilities such as:

- **Up to 250°C measurement suitable for industrial application**
(After the flu pandemic alert, the thermal scanner can be re-use and operate as an industrial temperature monitoring equipment)
- **Larger 2.8 inch LCD display with rotatable mount for ease of monitoring**
- **External SD card memory media**
- **Normal or Thermal Video output**
